

the genii

The genii® is the ultimate Champagne & Sparkling wine bottle Preservation System that is robust, portable and simple to use. It stops oxidation from occurring, naturally and safely by adding CO2 gas back into the bottle once opened, with an average of 72 uses per cartridge. Its purpose is to preserve Prestige Champagne & Sparkling wines served 'By The Glass' which sell more slowly. Users can open & serve premium Champagne & Sparkling wines confidently for several weeks, reassured that its fizz and flavour will be maintained down to the last drop. It's as if the bottle has never been opened!
